

Miguel Angel Rendon Hernandez

FullStack Developer + AI Assisted | React | Node.js | Laravel | PostgreSQL

Jalisco, México – 33 1869 2295 – mikehdez21@hotmail.com

www.linkedin.com/in/mikehdez21 | github.com/mikehdez21

Engineer with 3 years of experience in the development of scalable web applications, server administration, databases and continuous process improvement through automation and AI technologies. Experience applying Harness Engineering and AI agents to make improvements, refactors and bug fixes, following a methodology of prior planning, agent-assisted execution and validation of changes through manual review and testing.

Work Experience

Systems Development, Support, and Infrastructure Engineer

Hospital San Serafín - (02/2024 – At Present)

- I designed and implemented internal solutions to automate processes, improve traceability and increase operational efficiency, including:
 - Inventory Management of Fixed Assets in General Warehouse.
 - Helpdesk platform with QR flow, Forms and Power Apps that eliminated manual records and integrated dashboards in Power BI for managers.
 - Appointment Schedule System (External Consultation and Imaging).
 - Labeling System for CEYE Instruments.
- Analysis requirements together with key users and stakeholders to abstract negotiation needs into functional solutions, integrating MVP and iterative adjustments until adoption.
- I managed Ubuntu servers with Apache, PostgreSQL, and DNS configuration to evaluate the operation of internal applications and services within the corporate network.
- I generated custom reports in Crystal Reports and SQL queries in Toad for internal audits, management and operational areas, facilitating strategic decisions with accurate and up-to-date information.
- Reduced software licensing costs by 60% through technical analysis, renegotiation with testers, and migration to self-managed solutions, including implementation of Veeam Backup & Replication for high availability and disaster recovery.

Academic Background

- **Informatic Engineer**
Universidad de Guadalajara (CUCEI), 2020 – 2026 GRADUATE

Languages

- **Spanish** - Native
- **English** – B2

Technical Skills

- **Frontend:**
 - **React:** Redux, Router and Hooks
 - **NextJS:** SSR and SSG
 - **JavaScript and TypeScript**
 - **HTML, CSS and Bootstrap**
 - **Axios and Fetch**
- **Backend:**
 - **PHP Laravel:** Sanctum Sessions, Spatie, ORM Eloquent
 - **Node:** NestJS – ExpressJS
 - **Validation:** Zod
 - **APIs RESTful**
 - **ThunderClient and Postman**
- **Database:**
 - **PostgreSQL, SQLite, Supabase**
 - **SQL Joins, Unions, Views, Stored Procedures, CTEs**
 - **Crystal Reports**
- **IAs:**
 - **Harness Engineering:** Workflow Design and Agents Orchestration
 - **AI Agents for Assisted Development** (Warp – Opencode)
 - **Agents Hooks:** Prompts and Commands
 - **MCP Servers**
 - **Agent Skills**
 - **Prompt Engineering and Context Definition**
- **DevOps & Tools:**
 - **AWS** (EC2, RDS, Funciones Lambda, S3, CloudFront)
 - **Deploys in Vercel and Railway**
 - **WebSockets** (Socket.io, WS)
 - **Git / Github**
 - **Dbeaver**
 - **Linux Ubuntu** (CLI - GUI)
