Miguel Angel Rendon Hernandez

FullStack Developer + AI Assisted | React | TypeScript | Node.js | Laravel | PostgreSQL

Jalisco, México – 33 1869 2295 – mikehdez21@hotmail.com

LinkedIn | Github | Portfolio

Engineer with 3 years of experience in the development of scalable web applications, server administration, databases and continuous process improvement through automation and AI technologies. Experience developing and deploying applications across local development, staging and production environments, both on-premises and in the cloud. Experience applying Harness Engineering and AI agents to make improvements, refactors and bug fixes, following a methodology of prior planning, agent-assisted execution and validation of changes through manual review and testing.

Work Experience

- **Systems Development, Support, and Infrastructure Engineer**

Hospital San Serafín - (02/2024 – Present)

Designed and implemented "HSSAdminCare", an internal ERP-like administrative platform that consolidates multiple administrative systems and services into a single-page application using React, TypeScript, PHP/Laravel, multi-schema in PostgreSQL and an on-premise Ubuntu deployment. The platform includes:

- **Fixed Asset Inventory Module:** Management of suppliers, invoices, fixed assets, QR labels printed on Zebra printers, asset movements, asset responsibility forms, dashboards and scanned inventories.
- **Helpdesk Module:** Ticket lifecycle with issue categories, email notification priorities, SLAs, multi-technician assignment, third-party provider incident tracking and Power BI reporting for managers.
- **Administration RBAC Module:** Catalogs of users, employees, roles, departments, locations and fine-grained permissions.
- **Appointment Schedulin:** External consultation and imaging.
- **CEYE Instrument Labeling:** Templates and label printing for surgical instruments.
- **Other activities:** Generated Crystal Reports and SQL analyses, reduced software licensing costs by 60% through technical analysis, renegotiation and migration to self-managed solutions, including Veeam Backup & Replication for high availability and disaster recovery.

Academic Background

- **B.S. in Informatics**
  Universidad de Guadalajara, Jalisco, Mexico – Graduated 2026

Languages

- **Spanish -** Native
- **English –** B2

Technical Skills

- **Frontend:**
  - **React 18:** Redux, Router and Hooks
  - **NextJS:** SSR and SSG
  - **AstroJS:** Islands Architecture
  - **JavaScript and TypeScript**
  - **HTML, CSS and Bootstrap**
  - **Axios and Fetch**
- **Backend:**
  - **PHP 8.2 – Laravel 11:** Sanctum Sessions, Spatie, ORM Eloquent
  - **Node:** NestJS – ExpressJS
  - **Validation:** Zod
  - **RESTful APIs**
  - **Microsoft Graph API (Email Integrations)**
  - **ThunderClient, Postman, Yaak (API Clients)**
- **Database:**
  - **PostgreSQL, SQLite, Supabase, Oracle, MySQL**
  - **SQL Joins, Unions, Views, Stored Procedures, CTEs**
  - **Crystal Reports**
- **IAs:**
  - **Harness Engineering:** Workflow Design and Agents Orchestration
  - **AI Agents for Assisted Development** (Opencode, Claude, Codex, etc.)
  - **Agents Hooks:** Prompts and Commands
  - **MCP Servers**
  - **Agent Skills**
  - **Prompt Engineering and Context Definition**
  - **Spec-Driven-Development**
- **DevOps & Tools:**
  - **AWS** (EC2, RDS, Lambda, S3, CloudFront, CloudWatch, API Gateway, DynamoDB)
  - **Deploys in Vercel, Railway, Render and CloudFlare Workers**
  - **WebSockets** (Socket.io, WS)
  - **Git / Github**
  - **CI/CD**
  - **Dbeaver**
  - **Linux Ubuntu** (CLI - GUI)
- **Testing:**
  - **PHPUnit – Laravel Testing**
  - **React Testing Library**
  - **Cypress JS**
  - **Express JS**
